## 29th North Mississippi Fair Smashing All Records

Marvelous Exhibits on Display in the Various Departments. Polo Games, Races, Midway and Vaudeville Attraction Pleasing Enormous Crowds Every Day

### Greatest Crowd in History

Today is Illinois Central Day. Saturday to be Given Over To Traveling Men

All previous attendance records were shattered by several thousand at the opening of the twenty-ninth North Mississippi Fair and Race meet Tuesday when more than 16000 people passed through the gates. This included perhaps 9000 school children who had been given free passes for the first day which was designated "School Day." The crowds had been coming into Grenada for several days previous and on the morning of the opening day, the hotels and boarding houses were completely full and visitors were being sent to private homes for accommodations. The new grandstand, just completed in time for the fair, has a seating capacity of 4800 and all grandstand seats were sold out fully an hour before the racing program started.

The first thing on the program for Tuesday was the harvest, trades and floral parade which formed in the residence district of the town, marched through the business district, thence out Main Street to the fair grounds and twice around the track in front of the judges' stand. For some unexplainable reason there were a considerable number of floats that had been prepared for the parade that at the last minute failed to enter. Those that did enter, however, were representative of the various divisions and although the entries were few the parade was well received by the spectators and the decisions of the judges as to first and second places met with the unanimous approval of the crowds. The first prize in the harvest division went to Glenwild Plantation, that property south of Grenada belonging to John Borden, Chicago millionaire, who is taking such a keen interest in the development of this part of the state and who is actively engaged in promoting the fairs at Grenada. The float represented that familiar old plantation scene, the darkies with their banjos and guitars singing the old plantation melodies. The second prize in this division went to Nep Smith, whose entry realistically portrayed the possum hunt. There was the possum up the 'simmon tree, with the dogs on the ground, the old negro with his lantern and ax and a typical woods scene made up the entire float.

In the trades division, the first prize was awarded the Grenada Auto Co., dealers in Overland automobiles. Displayed on this float was the new Overland Champion automobile in use as a camp bed. There was the camp scene, cooking at the camp fire and the man with his hunting dogs and gun. The display was intended to show the versatility of the new model Overland and, so well did it fulfill its purpose, that the first prize was awarded it without a dissenting vote. The second prize in this section went to the City Lumber Co., its float displaying a model home in miniature with all essentials in home-building displayed over the float.

The first premium in the floral division was won by the Parent-Teacher Association. The float was beautifully designed and decorated and on it rode the high school primary teacher and one of the many splendid mothers in Grenada with a number of the children in the primary department of the city schools. Jim Lamb's float, "Grenada Beauties" was the popular choice for second place, this float carrying a score of beautiful Grenada girls, in attractive Japanese costumes, carrying the Japanese parasols.

Immediately after the floral parade had ended, came the football game between Charleston and Grenada High Schools which resulted in a score of 12 to 0 in favor of the local team. Charleston outweighed Grenada by many pounds but the home team outplayed them at almost every stage of the game.

A unique exhibition and one that has never been seen in this section of the country before was the sheep-herding by trained dogs. There were only two of the dogs but they without direction on the part of their master herded the sheep just exactly as they should and separated them as they should have been separated. The exhibition was a revelation to many of the visitors and met with generous applause.

The racing program for the first day's meet was marked by the two-mile relay running race, another new feature here. The riders of the horse change mounts at the end of the first mile and also change their saddles and bridles after which they finish the race. The first place was won by Odom, Wilson Wade coming second. In the quarter-mile dash, Grenada Girl was first, Nanibel, second and Black Cat, third, time 27. The feature race of the day, the 2:24 class, pace or trot, mile heats, 3 in 5, was won by Goldie Hughes, driven by John McAdams, second place went to L. P. S. and Pharners Best ran third, J. R. Hood won the purse in the free for all mule race.

All exhibit halls are crowded to capacity and the number and variety of the exhibits surpass anything ever before in this part of the state. There are thirteen registered Jersey bulls which are shown by the Illinois Central railway as a specimen of the kind of pure bred bulls loaned free of charge to the farmers in the territory served by its lines. The Illinois Central has also a splendid agricultural and dairy exhibit that it brought to Grenada from the Mississippi State Fair at Jackson and one which has been accorded much praise wherever shown. There are exhibits of all grades and classes of purebred and common cattle, and hogs and there are exhibits of ducks, geese, guineas and every known breed of chicken. The floral displays are magnificent in their own special bower where a beautiful fountain is playing all the time and which serves to keep the displays fresh and beautiful. In the Woman's Department may be seen exhibits of art, needlework, plain and fancy, of cooking, and of the other arts known only to woman. The displays in this department excited much favorable comment throughout the day and it was seen that a hard task awaited the judges in awarding premiums to the various exhibits. The displays in the agricultural section are exceptionally fine. There are exhibits from every county in North Mississippi and many from other parts of the state. There is every known variety of plant shown that may be raised in this section and there are many magnificent specimens. The Colored Department has a building to itself and the displays shown are worthy of the highest praise. There are exhibits of agriculture, and of the various things that bear testimony to the culinary skill of the colored women and to their handicraft with the needle. There are a number of premiums to be awarded in the colored department and many of the exhibits are well worthy of a prize.

One of the unique displays and one that is attracting much attention is the display in charge of the Prohibition forces of the government. There may be seen moonshine liquor in all its stages from the raw mash to the "finished" product. And

### Miss Frost Dies From Auto Injuries

Succumbs Sunday Morning in Oxford Hospital From Injuries Received in Accident Monday Before. Funeral at Coffeeville Monday Morning.

Miss Mary Alice Frost died last Sunday morning at two o'clock in an Oxford hospital as the result of injuries sustained when she was struck by an automobile truck driven by Ernest E. Penn on Monday evening, Oct. 15, as she was crossing the street from the park in the public square to the northeast corner of the square. For the first few days after the accident, it was thought that she was only slightly injured and that she would soon be well and strong again. But Friday night, complications developed and she was rushed to Oxford Saturday where it was hoped her life might be saved. Medical science and skill availed nothing and the end came peacefully at two o'clock the following morning.

The funeral services were conducted Monday morning at eleven o'clock at the Methodist Church at Coffeeville by the pastor, Rev. W. B. Baker, after which interment was had at Shiloh burying ground, six miles west of Coffeeville. The schools at Coffeeville dismissed and all business houses there closed for the funeral as a token of the regard for the young woman and her distressed relatives. Many from Grenada attended the services which were beautiful and touching.

Miss Frost was the eldest daughter of Mr. and Mrs. G. E. Frost, a prominent Yalobusha County family who moved to Grenada little over three months ago. Since coming to Grenada she had made friends of all whom she met. By her radiant and attractive smile, her pleasant and gracious manner and her beauty and her personality, she had endeared herself to all Grenada and was a favorite with young and old alike. She was an exceptionally bright young woman and her mind was quick to grasp any matter. Several months ago, she had taken charge of the insurance office of Miss Ruby McLeod during the latter's absence, and without experience or any previous knowledge of the work, had handled the entire business capably and well and had familiarized herself with practically all the details of the work.

Miss Frost was nineteen years of age on last Saturday, October 20, the end coming a few hours after her birthday had passed. Her death was one of the saddest and most tragic occurrences that has taken place in Grenada in a long while. She will be missed and her passing away will leave an aching void in many hearts. But consolation can be had in the knowledge that one more spirit has been added to the dwellers in the heavenly city and that she is waiting there for the coming of her loved ones and friends. Besides her parents and one older brother and a younger sister, other relatives survive to mourn her loss and to all of them The Sentinel tenders its most sincere sympathy.

There is a great object lesson to be learned from this exhibit. There is shown how the poison develops in the stuff and how it affects one's system who imbibes lightly or freely of the liquor. There are shown captured stills of every variety from the ordinary lard can and lead pipe to the copper still with the copper worm.

The midway attractions, furnished by the D. D. Murphy Shows Co., is by far the largest that has ever come to Grenada. There are amusements to entertain young and old and concessions of every conceivable kind and character. There is the ferris wheel, the whip, the tumble inn, the merry-go-round, the minstrel show, the side show exhibits and whatever may be found in a first-class carnival company may be seen on the midway at the Grenada fair grounds. The midway runs also at night and another night attraction is the dancing to music furnished by the "finished" product. And

### D. O. Semmes, Jr., Slain by Sid Long

Grenada 17-Year Old Youth Shot and Instantly Killed Thursday Afternoon by Bullet from Winchester Rifle in Hands of Painter. Killing Carefully Planned and Deliberately Executed. Lad Shot Through the Heart without Warning. Universally Loved.

D. O. Semmes, Jr., youngest son of Dr. and Mrs. D. O. Semmes, one of Grenada's most prominent families, was shot and instantly killed Thursday afternoon at 1:15 o'clock by Sid Long, painter and paper hanger, also a Grenada resident.

The affair was apparently one of the most cold-blooded and premeditated murders that has taken place in Grenada in a long time. It had evidently been carefully planned long in advance and, according to the story told by the slayer's wife, he had been awaiting an opportunity to kill the lad. Mrs. Long stated that she and her husband were married fifteen years ago in Grenada after she had eloped. Her home was in Wabaska, Ark. where her relatives reside at present. Mr. and Mrs. Long are the parents of four children, the oldest being a girl 13 years of age. She stated that their married life had been one round of difficulties and that her husband had often threatened to kill her. She further said that on the morning of the killing, he had again threatened her life, drawing a gun on her at the time, and that she lived in constant dread of death at his hands. Mrs. Long also said that twice since they had been married, she had left her husband, the last time being in the early part of this year. She said that her husband came after her then and, by threats, had made her return with him to Grenada.

Mrs. Long does not enjoy the best of reputations among the citizens of the town.

Long has evidently been a poor provider. The home is a tumble-down cottage on Levee Street near the corner of Fourth and Levee. There are no coverings on the floor; the windows have many panes missing; the place is badly rundown and in a bad state of repair.

Long is an adopted son of Charlie Long, living east of town. His father was Jim Johnson, who died when Long was a baby, living near the Alabama-Mississippi line, according to Long. Long thinks he is about 35 years old, is five feet five inches tall and weighs about 125 pounds.

Mrs. Long is thirty years of age, her birthday being on yesterday, the day her husband fired the fatal shot that took the life of one of Grenada's best-loved youths.

D. O. was sitting in his father's car just across the street from his father's drug store waiting for one of his older brothers, Zac, and they were intending to drive home together. Mrs. Long stated that when her husband left the house at twelve o'clock, he slipped the gun, a 38 calibre Winchester rifle, out with him and said to her, "You all do the best you can; I may never get back."

Just before the shooting, he had purchased six cartridges from Doak Hardware Co., whose store is just a few yards from where his intended victim was sitting. Zac Semmes was in front of the hardware store on his way to the drug store when he noticed Long creeping up on the car with his gun ready. He suspected that something was wrong and started running in an effort to prevent trouble. He reached the slayer just an instant too late, the fatal bullet having been fired.

The car was facing west on First Street. D. O. was sitting at the wheel. Long crept up from behind

and when he reached a position alongside the youth, he fired the fatal shot. There were powder burns on the boy's coat showing that the gun was fired at close range.

Dr. T. J. Brown, who was a short distance from the scene of the shooting, ran up at once. He examined the body and followed the course of the bullet, which entered just above the heart, severed the aorta and ranged up and toward the back, passing through both lungs and lodging against the ribs on the right side toward the rear.

"The boy had his left hand on the steering wheel when I reached him," said Dr. Brown. "He gasped, once or twice as I bent over him, but died almost as soon as struck."

Long was immediately placed under arrest and lodged in the county jail. He stated to a representative of this paper that he had been planning the shooting for two weeks or more, ever since he had returned home from Shelby, where he worked for a while at his trade. At that time, he said that his wife told him that young D. O., some weeks ago, drove up to the park in the square where she was waiting, with one of her children, for two of the others who had gone to the picture show, and that he drew a pistol on her, forced her to get in the car with him, taking the little child alone, and stated that he had driven out and assaulted her. He stated that he had no regrets over the occurrence and said that he would do the same thing again.

All the friends of the dead boy are inclined to discount this story. They believe that it is a fabrication of the woman in an endeavor to cover some misdoings of hers. The boy was a mere youth. If he had lived, he would have reached his eighteenth birthday next February. That he should have done a thing like that cannot be believed by his closest friends, those who knew him intimately and were constantly associated with him. He was quiet and unobtrusive and never meddled into the affairs of others, attending his own affairs strictly. He left Grenada on Sept. 11 to begin his second year's studies in Baller School at Chattanooga, Tenn. He had been making good records in his studies and had given promise of being an upright man and a splendid and useful citizen. He had just come home Monday to spend a few days at home and had intended returning to school Thursday afternoon. He was held in universal esteem by the entire town and his untimely death brings deep sorrow to the whole community.

No definite arrangements have as yet been made for the funeral but it will probably be held from the Presbyterian Church some time today.

He is survived by his parents, Dr. and Mrs. D. O. Semmes, and two older brothers, Raphael and Zac Semmes, besides other relatives to whom The Sentinel extends its deepest and sincerest sympathy.

Long was spirited away to a nearby county late yesterday afternoon by Sheriff Dogan, so it is reported. The Sheriff feared possible mob violence against his prisoner. Feeling against him has been running high ever since the killing and had he remained in Grenada last night, he would no doubt have met with summary justice.

### Polo Games Thrill Fair Visitors

Glenwild and Onwentsia Teams Furnishing Spirited Exhibitions Every Day at Fair Grounds. Teams Pretty Evenly Matched. Finale Saturday.

The Onwentsia poloists rode to an 8 to 4 victory over Glenwild Tuesday in the feature performance of the North Mississippi Fair's opening day. Captained by John Borden, who has brought polo into this section from Chicago where he is connected with the Yellow Taxicab Company, the Glenwild outfit put up a fast and strenuous battle, but was unable to stem the accurate shots and keen play of the Onwentsians. The two teams are composed of players many of whom are nationally famous. The schedule calls for five games, to be played at the fair grounds during the fair. To the winning four and the team alternate will be presented individual silver trophies, offered by Mr. Borden.

The ponies, 53 of them, were worked out here during the past week. They represent part of the strings owned by Mr. Borden, Robert McCormick, publisher of the Chicago Tribune, and Eugene Byfield, of the Hotel Sherman Company, Chicago. The trainers have the animals in excellent condition and responding readily to the rein. Mr. McCormick's ponies are among the finest heavyweight animals in the country. He purchased them recently from Sen. Robert L. Baker, of New York, paying \$2,500 each for five of them. Mr. McCormick weighs better than 200 pounds himself and requires a well-set mount. During the first chukker Mr. McCormick was forced to dismount when banged on the knee where water had formed a short time ago. He re-entered the game, however, and accounted for numerous dazzling strikes and thrilling carries.

In the first period Glenwild was the first to score, the goal coming from the mallet of Rader, an executive of the Lehigh Portland Cement Company. The second chukker found Onwentsia pressing closely, but unable to drive the ball through the poles. The deep orange shirts of Glenwild and the blue and orange jerseys of Onwentsia flashed up and down the 300 yards of the field featuring many pretty carries and hot scrimmaging.

The score was tied at one all early in the third period, when Frank P. Hayes, Chicago broker, caught the ball fairly and rolled it through the uprights for a goal. The lead was taken again, however, by Glenwild a few seconds before the bell ending the chukker on a goal by McCormick. The field was a bit slow for lack of use, but improved even during today's contest.

Onwentsia evened matters just before the first half ended and also climbed into the lead at 4 to 2. James L. Brees, Jr. shot one goal and two were accounted for by Hayes. The Onwentsia team, with a somewhat different make-up, won the midway championship at the Detroit Polo Club this year. On the team were Borden and Earle Reynolds, both of whom showed well. Reynolds is president of the People's Trust Company and the youngest bank president in Chicago. He is also a racquets player of some repute.

The second half started off slowly, but soon warmed up and fast play was provided. Rader scored for Glenwild, followed by a pretty goal from a difficult angle by Coonley, of Onwentsia. Hayes tallied again on a lucky shot which caromed from an opponent's horse between the posts. Spirited scrimmaging before the grandstand opened the sixth period, which was productive of no scores.

Onwentsia brought in two more goals in the final chukker, on shots by Coonley and Brees after hard riding and clever stroking had carried the ball within the danger zone. McCormick landed Glenwild's final point a few minutes before the game was called, bringing the final score

(Continued on page 5)

# WHOLESALE PRICES 156 POINTS ABOVE 1913 LEVEL

Wholesale prices began to take another upward trend in the middle of September and touched the highest level reached since last June. They stood on September 15 at 156 points above the level of 1913. This was an increase of 16 points over the index number of January 1, 1922.

Republican propagandists are telling the farmers of the country that their condition shows great improvement and that the prices of their products are some 15 per cent higher as a whole than they were a year ago. The fallacy of this statement is capable of demonstration.

Wholesale prices represent commodities which the farmer has to buy and those which have left his hands. The most recent figures indicate that they are now some 12 per cent higher than they were on January 1, 1922. In April last they were about 22 per cent above the level of January 1, 1922.

It is pointed out, therefore, that if there has been an improvement in the prices of agricultural products it has been accompanied by a rise in the farmer's cost of living, so that his gains have been taken from him by the trusts and monopolies which are so generously protected by the Republican profiteer's tariff.

The farmer's dollar is worth only 69 cents when he attempts to exchange it for commodities which he requires but doesn't produce.

## THE FINGER-PRINT

The finger-print system—one of the outstanding marvels of human ingenuity—was first used by the Royal Police in Bengal, India.

Its originator was the illustrious Sir William Herschell, who, it seems, combines with his star-gazing a sharp outlook on the practical.

No sooner had Sir William offered his suggestion to the police authorities than its value was recognized, and from the start its great usefulness was clearly demonstrated.

Another great scientist, Sir Francis Galton, began giving serious attention to the subject, and Prof. Purkinje of Breslau, in 1823, read a paper before the University of Breslau which may be said to have put the Science of Finger Prints squarely upon its feet.

All that was needed now was a practical system of classification, and that was furnished by Sir William Herschell, whose interest in the

science never flagged.

This supreme terror to evildoers is now in practice all over the world and its usefulness is beyond calculation.

Thousands of criminals, big and little, are brought to justice through this device who would otherwise be quite beyond the possibility of detection.

In the lines on the fingers, and on the thumbs especially, nature writes each man's identity, and the print on the material employed by the police tells the whole story.

To those who can read the cipher all is as clear as day, and in the finger-print the criminal is made to confess his guilt as clearly and unmistakably as though he declared it with his lips.

If the impression left by the suspect's finger is faint, so that it is somewhat difficult to decipher it, a little powder known to chemists as "Gray Powder" (a combination of chalk and mercury) is sprinkled over the marking and then very gently brushed away with a camel-hair brush. This brings out the imprint much more clearly.

For instance, if you place your dry thumb upon a slip of white paper no visible impression seems to be left, but if the powder is sprinkled over the spot and then brushed off, a distinct impression is seen.

Such are the means that have been furnished by the great Creator for enabling us to trace home to the criminal his wrong-doing.—New York World.

## TREASURY DEPARTMENT

Office of Collector of Internal Revenue.

Jackson, Miss. Oct. 11, 1923. Important to all Doctors, Dentists and Druggists:

According to a survey made yesterday by Collector of Internal Revenue G. L. Donald, covering registrants who hold permits under the Federal Government to manufacture, dispense and use narcotics in the Mississippi Collection District, it was found that there are practically 2700 of such registrants of all classes in this District.

It was disclosed by this report that there are in this District approximately 250 delinquent registrants who have failed to file the necessary return and receive authorization for the manufacture and administration of narcotics under the Harrison Na-

cotic Act.

Collector Donald warned such delinquents that the mere fact that they held no narcotics in their possession did not relieve them from the necessity of properly registering, and that if they retained any order forms for narcotics, issued by the Internal Revenue Bureau, and failed to register, or to return same to the Department for cancellation, they held such forms illegally and rendered themselves liable to the penalties under the Harrison Narcotic Act.

A list of all delinquents who have failed to register or to properly account for order forms for narcotics held by them is being prepared in Collector Donald's office, and field officers of the Internal Revenue Office will soon check up delinquent registrants who should have qualified not later than July 1, and to enforce the provisions of the act.

Inasmuch as a penalty of \$2,000 or a term of imprisonment of five years, or both, may be imposed upon violators of the Narcotic Laws, Collector Donald strongly urges those who have not made the necessary accounting of order forms and narcotics to do so at once and avoid liability to the penalties which may attend.

## A DONKEY PROBLEM

"Here's a problem for you, William: A donkey was tied to a rope sixteen feet long. Eighteen feet away there was a bundle of hay, and the donkey wanted to get to the hay. How did he manage it?"

"Oh, I've heard that before! You want me to say, 'I give it up,' and you'd say, 'So did the other donkey.'"

"Not at all."

"Then how did he do it?"

"Just walked up to the hay and ate it."

"But you said he was tied to a sixteen-foot rope."

"So he was. But you see, the rope

## Thin Blood

Thousands of pale, thin-blooded persons have found renewed strength and health in **FORCE Tonic**. It increases the red corpuscles, those disease fighting atoms of the blood.

**Force Tonic**  
It Makes For Strength

wasn't tied to anything else."—Exchange.

## HORRIBLE ACCIDENT

There was a drummer who was so thin He wouldn't go home alone, For fear some great big hungry dawg Might take him for a bone. One day when he was walking out And got all out of breath, He fell through a hole in the seat of his pants And choked himself to death.—Ex.

## Queer Feelings

"Some time ago, I was very irregular," writes Mrs. Cora Robie, of Pikeville, Ky. "I suffered a great deal, and knew I must do something for this condition. I suffered mostly with my back and a weakness in my limbs. I would have dreadful headaches. I had hot flashes and very queer feelings, and oh, how my head hurt! I read of

## CARDUI

### The Woman's Tonic

and of others, who seemed to have the same troubles I had, being benefited, so I began to use it. I found it most beneficial. I took several bottles . . . and was made so much better I didn't have any more trouble of this kind. It regulated me."

Cardui has been found very helpful in the correction of many cases of painful female disorders, such as Mrs. Robie mentions above. If you suffer as she did, take Cardui—a purely vegetable, medicinal tonic, in use for more than 40 years. It should help you. Sold Everywhere.

**FREE — Your first Treatment with An-uric, my Kidney-Backache Tablet.**

**Result of 50 years of Analyses in a Great Hospital.**

Fifty years ago my father, the late Dr. Ray V. Pierce, established the famous Invalids' Hotel at Buffalo, N. Y., surrounding himself with a staff of skillful physicians, surgeons and chemists. To this great institution comes a steady stream of patients from far and wide.

A great percentage of these patients are affected with kidney disease and many other thousands of kidney sufferers who do not come for treatment send samples for analysis.

So, here at the Invalids' Hotel, diagnosis and treatment of kidney trouble has been going on incessantly for fifty years.

Realizing the great need for an effective home remedy to correct kidney troubles in their early stages, I put our staff to work on the problem. In time they worked out an ideal formula, which, it was found, could be put up in handy tablet form.

I named this remedy "An-uric," because by strengthening the eliminative action of the kidneys, it works to free the sufferer from the evil effects of uric acid upon the nerves and joints.

I want all who suffer from weak kidneys, kidney backache and uric acid poisoning to have their first An-uric treatment at my expense.

It isn't necessary to write—just pin this advertisement to a scrap of paper bearing your full name and address and mail it to me.

This offer is intended for those who have to get up in the night, who are tired and lame every morning, who suffer with aching back, dizzy spells, mysterious headaches, darting pains, sore, swollen joints and any noticeable irregularity of the kidney action.

Dr. V. M. Pierce, Pres., Invalids' Hotel, Buffalo, N. Y.

**NO other tire has the slipless grip of the famous Goodyear All-Weather Tread.** Its high, thick, sharp-edged blocks grip hard, hold fast, and hang on. The result is a steady, sure, safe pace in any traffic or in any going, with a car and tire performance perfectly matched for economical efficiency.

As Goodyear Service Station Dealers we sell and recommend the new Goodyear Cords with the beveled All-Weather Tread and back them up with standard Goodyear Service.

## EFFICIENCY IN LINCOLN PRODUCTION

Detroit, Mich.—Changes, including the transposition of a number of manufacturing departments, nearing completion at the Lincoln plant division of the Ford Motor Company form an interesting sidelight on efficiency methods of the organization.

When a manufacturing plant is carrying on a heavy production, it is a matter of considerable difficulty to move a large portion of machinery from one place to another. Yet this is just what is being done at the Lincoln plant and without the least halt in output.

In fact, with the steadily increasing demand which the Lincoln is enjoying, production, thru the introduction of greater facilities, has been moved up and a new output record was established in August with shipments of 897 cars during the month, a gain of 97 over July.

During the eleven months Ford ownership in 1922 Lincoln cars shipments totaled 5,242, while so far this year 5,273 Lincolns have been manufactured.

Moving with the several departments into the new addition, which increased the plant floor space 311,000 square feet, is being effected under a highly scientific arrangement. The plan provides that raw materials and stock shall enter one end of the receiving room and gradually pass thru the manufacturing process to emerge at the other end of the building as finished products.

Conveyor systems, new and improved machinery and many other facilities are being installed to bring greater quality and refinement to Lincoln motor cars.

Illustrative of the close attention to detail which enter into every phase of Lincoln car production is one small department where clocks used on Lincoln cars are received. These are manufactured by one of the country's foremost watch makers. Nevertheless, in this department, every clock undergoes an eight day test before being permitted to take its place on a Lincoln car instrument board.

## HEALTH NEWS ITEM FROM COUNTY HEALTH OFFICER.

The Mississippi State Board of Health is conducting a campaign for the prevention and control of diphtheria and solicits the cooperation of the physicians, health officials, school authorities and parents of the State.

A school should not be closed when there is an outbreak of diphtheria, but modern methods should be used to suppress the disease. There are three essential steps to be taken in dealing with diphtheria in the schools.

First—The isolation of those who contract the disease and the quarantine of contacts, that is, those who have associated with the child or person who has the disease.

Second—Taking swabs of the throats of the children of the same grade of those that contract diphtheria and other children which, in the judgment of the County Health Officer, have been associated with the case in question. This is done to locate carriers, which when located should be isolated and treated.

Third—Children should be immunized by being given toxin-antitoxin.

If the Health Officers and school authorities follow up outbreaks of diphtheria in the schools the disease can be controlled and death prevented.

It is doubtless not generally known that several weeks are required, or about two months, for immunization in the use of toxin-antitoxin. Therefore, parents should not wait or delay in administering this preventive measure. After the disease develops it is too late even for children who have been associated with the case for immediate results.

There is no occasion for parents to have any fear in having toxin-antitoxin administered because if the child should perchance contract diphtheria, there is no danger in administering antitoxin. It should be emphasized that as many as 90 per cent of the children are permanently immunized by the use of toxin-antitoxin. Care should be used to administer toxin-antitoxin.

Because of the danger of diphtheria why wait to give a safe and protective remedy?

Very truly yours,  
R. A. CLANTON

## TREASURY DEPARTMENT

**All Profits From Real Estate Returnable as Income.**

Investigations conducted by field deputies of the Internal Revenue Service indicate that hundreds of taxpayers in the District of Missis-

sippi have neglected, intentionally or otherwise, to include as income in their returns for 1920, 1921 and 1922, profits realized from the sale of real estate, according to Collector Donald who several weeks ago ordered a rigid probe to be made of suspected evasions of income regulations.

In order to close up the Government tax net, the Collector has ordered that a transcript be made of all doubtful transfers. A careful investigation will be made of all these files, to determine whether or not the sales involved have been reported upon the income tax returns, Collector Donald suggested that all persons who failed to include the profit realized from real estate sales call at his office, or file amended returns, as it is the policy of the revenue department not to assert heavy penalties when the disclosures of failure to include income are voluntarily made by taxpayers.

"It is my belief that the failure of many taxpayers to include real estate profits in their returns was due to an erroneous interpretation of the income tax laws, and to misleading publicity that was given out prior to the ruling of the United States Supreme Court, holding that such gains were taxable income under the revenue laws," Collector Donald stated.

In cases where the taxpayer does not voluntarily disclose items of income that were omitted, and where the gains from real estate sales have not been reported, the Collector said that it would be necessary to assert full penalties from all returns where the investigation disclosed the failure of the taxpayer to include real estate gains in his income tax returns.

## PRAYER FOR RAILROAD MEN.

At an annual meeting of the conductors and engineers some time ago, Rev. George R. Stuart, one of the favorites with railroad men of the South, was asked to take part and open the meeting with prayer, says an exchange. He was loudly applauded as he entered the hall and stepped upon a platform to offer prayer. The railroad men with their wives and daughters present reverently bowed their heads, and George Stuart, with trembling lips and deep emotion, offered the following prayer, and as he left the platform a dozen men gripped his hand and brushed a tear from their eyes:

"O Lord, we meet as a body of railroad men, with our wives and daughters, to consult for our interest. We are reminded that life itself is a train and the road to heaven a railroad. God's truth the rail, God's love the fire, and His promises the signal lights. Oh, we recognize Thee as the General Manager of our road, the Superintendent of our train and Chief Dispatcher. Thou didst survey the right-of-way and Thy Son didst purchase it with his blood. Thou didst lay the track and ballast the road; Thou hast furnished the rolling stock; Thou art the owner and controller of all. We look to Thee for all our orders and Thou must sign the checks for our daily bread. Be merciful in handling our human mistakes and blunders and do not discharge Thy unworthy servants.

"We are grateful for the Bible, Thy book of rules and instructions; be merciful in our examination and look with charity upon our failures. Thy promises and warnings are our headlights and hand lanterns; help to use them so as to save our train from wreck. Deliver us from broken rails, blind switches, false signals, and mistaken orders. Be with us on every high bridge of responsibility on every sharp curve of emergency and in every dark tunnel of trouble let the light of Thy promises shine out bright. Grant us passes for our wives and children and let them go with us. When the storms of temptations and trial come, save us from the fatal slides and washouts that have wrecked so many trains on the road of life. Let our way, kept secure by Thy guardian care, always show the steel rail and rock ballast, and be solid and firm and free from obstruction placed for the wreckage snares of our enemy. May the headlight of the truth shine bright on a throwswitch, false signal or fatal obstruction placed for the wreckage of our train. May the emergency brake of a strong will save us.

"As we make our last run, headed homeward, if it be Thy will, order our train in on time. Let the light of Thy promises burn bright to light the last dark tunnel of death. As we run through into the Grand Central Station of the skies, may we have the approving smile of the General Manager and Superintendent; sign with joy the payroll receive our wages and have an eternal lay-off with God and angels and the loved ones at home. And we will praise Thee forever. Amen."—Railroad Magazine.

## STATE DEPARTMENT OF EDUCATION

Jackson, Miss., Oct. 19, 1923. Weekly News Letter from the State Department of Education by W. F. Bond, Supt.

The work for crippled boys and girls and men and women begun by the State Department of Education in the summer of 1921 has not only brought happiness to the lives of hundreds of fine Mississippi boys and girls and opened the door of hope to many who thought it had forever closed against them, but has brought wonderful results from a financial standpoint.

During the fiscal year just closed the total annual earnings of 133 crippled citizens has been increased from \$48,000 to \$126,000. Since the state puts up only \$17,000 a year for this work it is easy to see that it has been a splendid investment.

Every cripple is entitled to a chance.

*Good to the last drop*

On state occasions—either festive or grave—the attention is often equally divided between the guest of honor and Maxwell House Coffee.

## MRS. B. F. TURNER PASSES AWAY.

Mrs. B. F. Turner, aged 71, passed away at her home at Tie Plant Monday at 12:40 p. m. after an illness of some weeks. The funeral services were conducted Tuesday morning at ten o'clock by Rev. Arthur Sledge pastor of the Methodist Church at Duck Hill, and Rev. H. G. Roberts, pastor of the Methodist Church at Tie Plant, after which interment took place in Odd Fellows Cemetery.

Mrs. Turner had long ago become a member of the Methodist Church and truly did she live up to her religious beliefs. She was a devoted and loving wife, an affectionate and tender mother, spending the greater part of her time in making the home life

of her loved ones congenial and pleasant.

Her husband, she is survived by two sons and two daughters, all grown, and other relatives to whom The Sentinel expresses its sincerest condolence.

## BINGHAM REGULAR CLERK

Due to the increased business of the Grenada postoffice, it has been found necessary by the postoffice department to add another clerk to the force in the local office. The place was given to J. G. Bingham, who has been serving for some months as substitute and relief clerk. Mr. Bingham's promotion came as the result of his industry and his attention to his duties.

## 100 Years of Saving

The first savings bank in the United States was opened in 1816.

There were then 246 banks in the United States. Today this country is served by 27,062, banks whose combined resources are nearly 28 billion dollars.

Thrift has done that much in one century but there is much greater work for thrift to do.

Help yourself by becoming independent. Help the country by helping yourself.

## WHAT THE VISITOR THINKS

We are reproducing below extracts from an article in the Commercial Appeal Thursday morning showing what impression the visitor to Grenada gains. The article is from the pen of Mr. Mallory Chamberlin, staff correspondent for the Commercial Appeal, who was sent to Grenada to cover the fair. We here in Grenada fail to appreciate what we have in our midst and are oftentimes dissatisfied and complain about a "dead town" and things being so slow. We are just accustomed to what we have and at times the same things grow monotonous to us. If we would get away occasionally for a change of scenery we would know how to appreciate Grenada more. We know it is one of the prettiest and cleanest towns in the state and is the abiding place of a solid, substantial, home-loving citizenship.

"This thriving little town is doing itself proud this week on the occasion of the 29th North Mississippi Fair which opened with a rush and with record-breaking attendance yesterday. With a census population of 2,800 people Grenada probably has 4,000 inhabitants. This week more than triple that number are being taken care of in the hotels, private homes and even in tents pitched along the roadside.

"The fairgrounds is naturally the magnet which has drawn thousands from the neighboring counties, including Grenada, Noxubee, Winston, Attala, Holmes, Washington, Sunflower, Leflore, Carroll, Montgomery, Choctaw, Oktibbeha, Lowndes, Monroe, Clay, Webster, Bolivar, Tallahatchie, Yalobusha, Calhoun, Chickasaw, Itawamba, Lee, Pontotoc, Union, Lafayette, Panola, Quitman, Coahoma, Tunica, Tate, DeSoto, Marshall, Benton, Tippah, Alcorn, Prentiss and Tishomingo. From these districts have been sent representative exhibits covering all manner of vegetables, fruits, stock and handwork of various kinds. Nearly all of the counties are represented by one or more features.

"The outstanding impression received by the casual visitor is that Grenada is building for permanence. During the past two years close to \$50,000 has been expended, and wisely, in the construction of building and equipment which places the North Mississippi Fair among the leaders in the south. Largely responsible for the sound expansion of the project is John Borden, Chicago financier and president of the fair association here. His own Glenwild Plantation has been the show place of the section for several years, but he has not stopped there. His good offices have been extended into the surrounding territory and have prospered. The fair association has as its aim the advancement of agriculture and livestock. On the list of officers with Mr. Borden are H. T. Calhoun, vice-president; E. H. White, vice-president; S. M. Cain, Secretary; H. J. Ray, treasurer, and K. Mattingly, W. B. Hoffa, Wilson Wade, Dr. J. P. Broadstreet and R. W. Jones, trustees. These men have devoted themselves unselfishly and untiringly to the work at hand and with marked success. Instrumental in the progress of the fair as well as in the growth of Grenada has been J. T. Thomas, president and directing genius of the Grenada Bank and its 12 Mississippi subsidiaries.

"Among the structures of permanent nature housing the fair are the new grandstand with a capacity of 4,800 people, buildings for the cattle, hogs and sheep, poultry, agriculture, kitchens and lunchrooms, the woman's building, ladies' rest room, club boys and girls building, office and stables and polo barn."

## ABOLISH OFFICE OF SUPREME COURT REPORTER

In making a sort of survey of the field to see where reduction can be made and useless offices abolished, among the first things that come to our mind is that of the office of Supreme Court reporter.

We would not be understood as holding that the reports should not be published. It is important that they should be. The duties of the office are now being discharged by one of the most distinguished and one of the ablest lawyers of the State, Judge Robert Powell. Judge Powell is one of the State's most brilliant men. He illuminates any subject he discusses and there is hardly a man in the State that has more loyal friends than he, and there is none that has shown himself to be more worthy of loyal friends than Judge Powell. We have the honor of claiming him as our good friend.

But personalities aside. We are looking at this matter from the interest of the taxpayers. So far as we know Judge Powell's tenure is indefinite. But there is no need of having two men, or two sets of men, do the same work.

The Legislature, at its 1920 session, knocked down many barriers and ran roughshod over many precedents. It passed a law increasing the salary of the Judges of the Supreme Court \$2000 each under this sort of subterfuge. We say "subterfuge" for the reason that section 166 of the Constitution of Mississippi says that the salaries of the judges "shall not be increased or diminished during their continuance in office." The 1920 law blindfolding around this constitutional mandate increasing the Supreme Court Judges salaries reads:

"Salary of each judge of the supreme court, as such, shall be forty five hundred dollars (\$4500) per annum.

"In addition to their duties as judges, the several judges constituting the supreme court are hereby created a commission to determine and select which opinions of said court are to be officially reported, to prepare or supervise the making of head notes or syllabi to said opinions and to annually prepare for publication a digest of all of the decisions of the supreme court construing any section of the constitution and statutes of this state, and shall each receive as compensation for said duties two thousand dollars (\$2000) per annum."

Now it is evident to any mind that the so-called extra placed on the supreme judges is practically the work that the law imposes on the Supreme Court Reporter, and we see no need of an overlapping of work or of having two men to do one man's job.

A few years ago when there were heroic efforts being made to add three more supreme court judges because the then three judges "could not do the work," the suggestion of adding additional duties would have been worse than shocking.

An arrangement might be made with the Southern Reporter to get out the reports at a trifling cost and thereby largely save the salary of the reporter and the reporter's secretary.

The time has arrived to put the knife deep. Let's not have operations that just get under the skin. Plain speaking and direct acting is demanded. Let's begin to put down in black and white what ought to be cut out and where and how much appropriations ought to be cut down.

There are other things, quite numerous ones, where offices can be eliminated and appropriations cut down without in the least doing injustice to the public service. We shall deal with these from time to time. The candidate who is unwilling or afraid to "spit it out", and state his position without any equivocation, should be left at home.

The above appeared in our editorial columns February 23, last. What we said then is no less true today.

Just the other day the Court elected Judge J. Morgan Stevens as Reporter. We have the honor to claim Judge Stevens as our friend. He is an able lawyer and is capable of filling any place in the judiciary. But the question is not one of friendship or of providing a place for anybody, but one of a business management of the affairs of the State's business. It is one that concerns the taxpaying public.

We would not be understood as holding that \$6,000. is too much to pay a lawyer qualified to serve on the Supreme bench. We do not think it is, and if the matter were submitted in the way of a constitutional amendment, the only proper and legal way in our judgment, to get the salaries of these officials increased, we would vote for it. But to our way of thinking for the highest court in the State to consent to a rape of the Constitution to permit an increase of its salary looks worse than bad and is a sort of invitation to others to violate the law.

For this is my maxim. I hold that the party receiving an obligation should ever remember it, the party conferring it should forget it immediately, if the one is to act with honesty, the other without meanness.—Demosthenes.

At the morning family worship the day before he died Robert Louis Stevenson offered the following prayer: "The day returns and brings with it the petty round of irritating concerns. Help us to play the man. Help us to perform our duties with laughter and kind faces. Let cheerfulness abound with industry. Give us to go blithely on our business each day, and bring us to our resting place weary but undishonored, and grant us in the end the gift of sleep."

Propriety of thought, and propriety of diction, are commonly found together. Obscurity and affectation are the two great faults of style.—Macaulay.

## FIRE AT SENTINEL

### OFFICE SUNDAY

Trying to "Pull Ox Out of Ditch" When Motor Burns, Practically Tied Up for Most of Week.

Sunday afternoon while trying to "pull the ox out of the ditch", fire broke out in The Sentinel office, burning out a motor. The motor had "stuck" a day previous and no electrician was available to see what the trouble was. Sunday afternoon, while endeavoring to clean the motor, nearly by gasoline exploded, evidently from a spark from the wires, considerably damaging the motor, necessitating its shipment to Memphis for repairs. It will never be understood how the fire was caused as the electric switch was cut off and how the gasoline could have caught is not explainable.

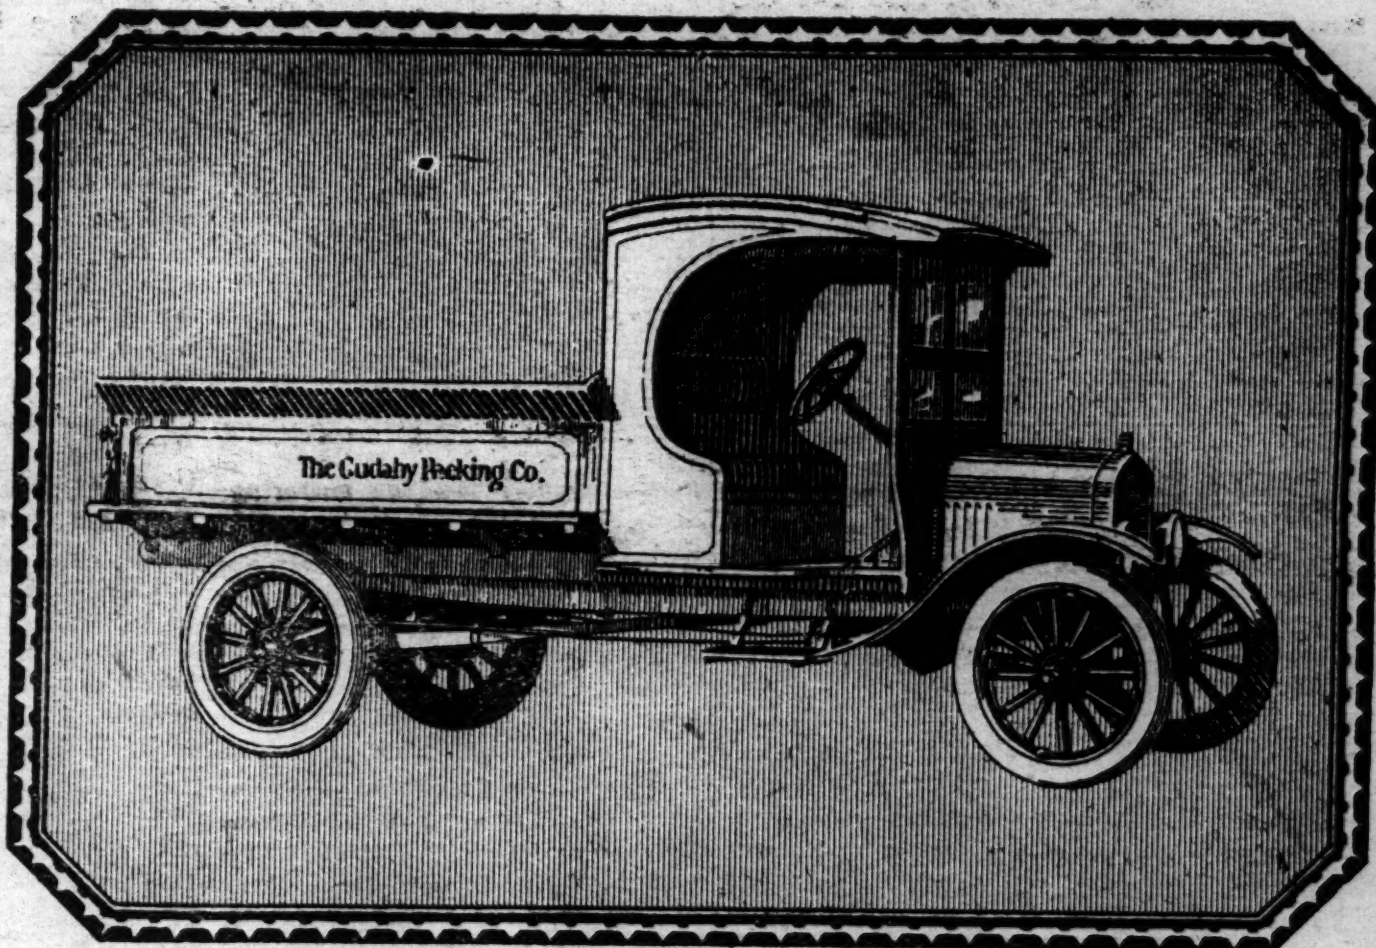

Through the courtesy of W. E. Jackson, The Sentinel was enabled to

get out some rush jobs the first of the week, which prevented the shop from getting so far behind with work. The Liberty Electric & Manufacturing Co. of Memphis did an unusually prompt repair job on the motor, and Wednesday night it was again wired up by Maurice Clark, the accommodating and obliging operator at the Grenada Opera House.

## EDITOR IN HOSPITAL

The Editor of The Sentinel has been in the Lucy Brinkley Hospital in Memphis since Monday of last week and expects to have an operation performed next week. The operation will not be a serious one and he hopes to be back home within a few weeks much improved in health. He is deeply grateful for the solicitous inquiries of his friends and for the encouraging and cheering letters he has received from many of them.

**Ford**  
Truck Chassis  
\$370 f.o.b. Detroit

Flare board body type, ideal for packers, plumbers and others handling heavy merchandise. Body types to meet every hauling requirement can be supplied.

A dividend-paying business utility—a title the Ford One-Ton Truck has earned for itself through years of reliable service in diversified lines.

Powered by the famous Ford Model T engine through the Ford planetary transmission and special Ford worm gear, it brings to the business man for his delivery service the abundant power, reliable operation, and real economy for which the Ford product is notable everywhere.

It carries its load day in and day out with a minimum of attention. Its ease of handling adapts it for use in the limited areas about loading docks, warehouses and construction locations.

Giving rapid, dependable hauling service at low initial cost, and at the lowest possible expense for operation and upkeep, it pays the highest dividend on the investment of any motor transportation equipment available to the business world.

These trucks can be obtained through the Ford Weekly Purchase Plan.

## Local, Social and Personal

**ADVERTISING RATES**—Classified Advertisements, Cards of Thanks, Notices, In Memoriams, and other reading notices 2½¢ per word for each insertion, payable cash in advance.

Mrs. B. W. Gowdy came down Monday from her home in Batesville to spend fair week in Grenada with her son and daughter, Rev. and Mrs. Melville Johnson.

Misses Elizabeth and Edith Pearson arrived home last Sunday afternoon after an absence of several months which time was spent in Los Angeles, California and El Paso, Texas visiting relatives.

John P. Pressgrove and Roy Burt made their customary Sabbath day trip to Batesville last Sunday afternoon returning that night.

Walton Todd and Robert Mullin arrived a few days ago from Tuscaloosa, Ala. where they are in school at the University of Alabama to spend this week with homefolks while taking in the fair.

Misses Ruth and Rebecca Stokes were in Jackson for the closing day of the State Fair last Saturday.

Miss Adele Hoffa came down from Memphis Wednesday morning to be here for Home-Coming Day at the fair. She was the guest of her brother, W. B. Hoffa, and family.

A. R. Dockery left last Sunday morning for Morgantown, Ky. to be with his parents, Mr. and Mrs. A. Z. Dockery, on Monday, Oct. 22, for the occasion of the celebration of their fiftieth wedding anniversary. Mr. Dockery is the sixth of seven children and The Sentinel hopes that he will get to attend many more of his parents' anniversaries.

Mrs. C. W. Kosman left the latter part of last week for New Orleans where she went for a month's visit with her parents, Mr. and Mrs. I. C. Morais.

Miss Anna C. Dubard of Charleston was the attractive guest of Miss Sallie Billups on College Street for the past week-end.

Mrs. T. F. Harper, formerly of Grenada, now of McComb City, spent a short while the latter part of last week in Grenada as the guest of Mr. and Mrs. H. W. Alexander, and family on College Avenue. She was en route to visit relatives in Water Valley.

Alius Sweeney who is in school at Mississippi College at Clinton came home for the first of the week to be here for the fair.

Frank Hubert who is in school at the Alabama State University came home a few days ago to spend this week with homefolks while attending the fair.

Mr. and Mrs. Edward A. Jones came over from their home at Hill-house to visit their mother, Mrs. G. B. Jones, while attending the fair.

Miss Emma Duval arrived Monday at noon from her home in Sardis to spend a few days in Grenada as the guest of her niece, Mrs. E. R. Proudfoot.

Mrs. Cora Griffin left last Thursday afternoon to spend several days in Memphis.

Mrs. William Crawford left Monday at noon from her home in Brookhaven after having been for several days the guest of her mother, Mrs. R. D. Moreton, and her aunts, Mesdames Betty Cole and Margaret Brown, on Main Street.

Mrs. W. H. L. Carruth arrived last Thursday afternoon from her home in Sumrall to spend some time in Grenada visiting her parents, Mr. and Mrs. W. B. Barnes.

S. H. Horton, local manager for Threefoot Bros. & Co. spent several days this week in Holly Springs on business.

Mr. and Mrs. J. L. Scott are having the pleasure of entertaining in their home on College Street this week for the fair, Mrs. Scott's sister, Mrs. H. B. Hull, and their son's wife, Mrs. Jack Scott, both of whom arrived several days ago from their home in Chicago.

WILLIAM E. FROST (Brother)  
MARTHA ELIZABETH FROST, (Sister)

### ANDERSON-BAILEY

Mr. R. W. Anderson and Miss Zana Bailey were united in marriage Wednesday evening by Rev. W. E. Farr, pastor of the First Baptist Church in Grenada, the ceremony taking place at his residence on Third Street.

Mr. Anderson is employed by the Grenada Auto Co., and is recognized by his employers as a young man upon whom they can place dependence. He has a host of friends in Grenada, all of whom know him to be thoroughly trustworthy and reliable. His bride is an attractive young woman, whose home is in Charleston. She is gifted with all the attributes necessary to enable her to meet the duties and obligations she has assumed.

The Sentinel extends congratulations and best wishes to the happy couple who will make their home in Grenada.

## POLO GAMES

### THRILL FAIR VISITORS

(Continued from page 1)

to Onwentsia 8, Glenwild 4. Lineup: Onwentsia No. Glenwild Coonley 1 Borden (c) Breese 2 Rader Hayes 3 Calhoun Reynolds (c) 4 McCormick

Summary: Scoring: - Onwentsia Hayes 4, Breese 2, Coonley 2. Glenwild; McCormick 2, Rader 2. Time of chukkers 7½ minutes. Referee, Laurence H. Armour; field umpire, Graham Grosvenor; timer, Eugene Byfield.

In a rapid-fire contest featuring hard riding, clever stroking and long carries the Glenwild polo four carried to defeat the Onwentsian outfit by a 9 to 7 score at the fair grounds Wednesday in one of the main attractions of the North Mississippi Fair. The play was considerably faster than that seen Tuesday when Onwentsia won by 8 to 4. The teams thus tied in the race for the individual silver trophies and will decide the winners in three more matches. Smoother teamwork was in evidence today and kept the spectators keyed to a fine pitch.

Two of the players seen Tuesday were replaced in the second game. Col. Robert McCormick, although he finished the first game, was painfully injured and expected to return to Chicago Thursday to have his knee cared for. Earle Reynolds, who was one of the brilliant performers Tuesday, was hurt on the right hand when hit by an opponent's mallet and did not ride in the second game.

The scoring was started in the first chukker when Eugene Byfield drove the ball down the field in three successive strokes and sent it between the wicker poles. Byfield filled the role of timer Tuesday and was apparently out to make up for lost time. His riding and stick work were among the features of the match. Captain Calhoun followed shortly after with another point, putting Glenwild two goals in the lead before a score was made by Onwentsia. The first Onwentsia goal came unexpectedly when the pony ridden by Bud Rader, Glenwild, kicked the ball through Onwentsia goal in a lively scrimmage.

In the second chukker John Borden tallied for Glenwild while Prentice Coonley and Frank Hayes came through for Onwentsia, tying the score at 3 to 3. Early in the period Coonley had the misfortune of driving the ball through the posts, giving another point to Glenwild. The lead was of short duration, however, Hayes crashing in with a well-played point which brought Onwentsia on even terms again.

Opening the fourth chukker Hayes, who was furnishing some sensational riding, gave Onwentsia the advantage with a clean drive between the uprights. Calhoun showed a few minutes later for Glenwild and the period closed with the score five all.

At this stage Rader and James L. Breese, Jr. were getting in some of the keenest polo of the afternoon. One of the prettiest plays in the game came when Rader nursed the ball half the length of the field and pushed it through the poles for Glenwild. Breese was putting up some splendid defensive work and also carried the ball several times into the danger zone, only to lose it at the crucial moment. Onwentsia tallied again on a shot by Hayes, but could not hold in the Glenwild team sufficiently to prevent another point in the fifth chukker. Rader made this score on a bad shot by the Onwentsians, which was sent across in front of their own goal where it was picked from the ground by Rader and turned into a point for Glenwild.

The sixth period, which was the final one, saw Rader once more in the spotlight when he smashed the ball to make the score Glenwild 8, Onwentsia 6. Graham Grosvenor brought Onwentsia closer in a strike through the posts during a hot scrimmage. Borden, Glenwild leader, rode in with the final point after some excellent carrying and the game ended with the score Glenwild 9, Onwentsia 7. The line-up:

Glenwild: 1 Byfield; 2 Borden (c); 3 Calhoun; 4 Rader. Onwentsia: 1 Grosvenor; 2 Breese; 3 Hayes; 4 Coonley (c).

Summary: Scores for Glenwild: Rader 3, Borden 2, Calhoun 2, Byfield; Coonley. Scores for Onwentsia: Hayes 4, Coonley, Grosvenor, Rader, Referee, Laurence Armour; timer, Cal McCormick.

After losing the first game Tuesday and winning the second Wednesday the Glenwild poloists broke into the lead Thursday with a 10 to 7 victory over Onwentsia. From the spectators' point of view the match was the best so far. It was marked by some brilliant drives and only a

few instances did the ball slow up on account of close melees. The cheering was greater than usual and the players remarked after the contest that more applause was given than is found in the north and east.

### 29th NORTH MISSISSIPPI FAIR SMASHING ALL RECORDS

(Continued from page 1)

ed by an excellent orchestra on a special pavilion.

The second day of the North Mississippi Fair, was featured as Home-Coming Day. Hundreds and hundreds of former citizens of Grenada were welcomed back home by their old time friends and acquaintances. They came from far and near to be here for the celebration in their honor. Each, upon his arrival at the fair grounds, was asked to register at the secretary's office so that some knowledge might be had of just who was here. There is a peculiar sentiment attached to the "old home." Just to get back and see the old places familiar to childhood and to see the faces of old friends, gives one a glad feeling, glad that he was enabled by Providence to get back to the scenes so dear once more. A hearty and cordial welcome was accorded the home-comers, every effort being made to make the day one thoroughly enjoyable to them. So well were they pleased with the events of the day that many decided to put the cares of prosaic business life aside and to stay and participate in the festivities for the remainder of the week.

The program Wednesday was marked by some spirited and close finishes. The two-mile running relay race was cancelled on account of lack of sufficient entries to fill. The first race, the 2:18 pace, mile heats, best 3 in 5, purse \$200, was won by Mattie M., owned and driven by W. Bryant, second money going to Deacon Zeke, owned and driven by Dr. W. R. Miller, while Glenrose, owned by O. V. Saxon and driven by John McAdams, ran third. Time 2:19½. Billy Mitchell, driven by W. Nelms, who also ran, spilled on the first turn in the fourth heat, putting him out of the balance of the race. In the final heat Mattie M., won by a nose despite the fact that one of the tires on the sulky was flat. The half-mile dash, running, purse \$100, resulted as follows: Happy Girl, first, Bear Cat, second, Grenada Girl, third, Time .55. Charles Perry, a Grenada farmer lad, won the mule race by a nose.

The prize for the reddest-haired girl that came to the fair was won by Miss Marie Wilburn. There was only one entry in the red-haired boys' contest and no prize was awarded. The premiums were offered by B. C. Duncan, who is particularly fond of red heads due to the fact that his first grandchild is a red headed boy. The youngster, however, was barred from participating in the contest.

Topping off the third day of the fair, a day replete with excitement and thrills, an enthusiastic entertainment complimentary to Mr. and Mrs. John Borden and their guests was given by the citizens of Grenada at the Spring Lake Club. After an

informal reception in the director's room of the Grenada Bank the goodly gathering adjourned to the club. There, on the banks on the lake and under a full moon and clear sky, the party enjoyed a monster Brunswick stew and barbecue dinner. The occasion served as an appreciation of the benefits accruing to the Grenada district through the generosity and interest of Mr. Borden.

The ladies held sway at the fair grounds Thursday, the day being set aside with their special purposes and the main interest focused on their exhibits and activities. There was the home demonstration exhibit, wherein the women of northern Mississippi were given an opportunity to absorb many lessons of economy and utility. The better baby show also came in for its meed of attention. This is part of the health programme fostered by the Woman's Club here. A child specialist from the state health department is on hand to examine children under the school age and co-operate with the mothers.

In the first race Thursday, the 2:16 trot, Helen Bond, owned by R. R. Jones, took first place. Jennie Mack, owned by W. Bryant, took second; Dillard Axworthy, W. N. Stroub owner, was third, and L. P. S., owned by S. P. Steproe, fourth.

The two mile relay found W. Odom in the lead, followed by Wilson Wade and with L. Finney third. Happy Girl, owned by W. Bryant, took first place in the five-eighths mile dash. Grenada Girl, E. R. Smith owner, landed second money; John Borden's Come Again placed third and Bear Cat, F. Smith's horse, was brought home fourth.

Two events in the saddle horse class were staged, turning in Mrs. J. W. Taylor as the best lady rider and Miss Louise Hoffa as next best. H. T. Calhoun was adjudged the owner of the best saddle horse. Second place went to J. W. Wood and third to Mrs. J. W. Taylor. The judges were Will Scurr, R. B. Thomason and L. D. Butler.

Throngs from neighboring counties still continue to come in for the fair. Many have returned home after a short visit, but others have immediately taken their places and kept the town's accommodations hard pressed to handle them all. The opening day developed the largest crowd, due mainly to the presence of thousands of school children from this section of the state who were given complimentary admission on that day. The record attendance was about 16,000. Succeeding days have found approximately 10,000 on hand.

Today is Illinois Central Day at the Fair. An invitation has been extended President Markham and all I. C. officials to attend the fair on the day set aside in honor of their line, one of the greatest common carriers in the country. Many have accepted the invitation and some of the officials have already arrived in Grenada. The Illinois Central has done everything possible to encourage the development of the sections served by its road and has been especially zealous in its efforts to promote the North Mississippi fair.

Tomorrow will be given over to the

traveling men who are coming in full force from all over the state. Saturday is the closing day of the fair and tomorrow night the curtain will ring down on the greatest exposition that has ever taken place in this part of the State.

The weather has been ideal all the week. It has been true fair weather—fair for the fair. If today and tomorrow the weather man continues to be as good to the fair association as he has been all the week, there will be no cause whatever to complain against him. The weather could not have been more desirable.

### DOCTORS EXPRESS THANKS

We want to express to the good people of Grenada our sincere appreciation for the many useful articles donated to our hospital last Friday, in the shower given for the hospital by the ladies of the town. We appreciate the splendid spirit manifested toward the enterprise which we shall endeavor to make it worthy of good citizens of the community.

Dr. F. S. Hill  
Dr. J. K. Avent

### GRENADA HOSPITAL SHOWER

According to plans as previously announced for Friday, October 19th, 3 to 6 o'clock p. m. the Grenada Hospital held open house, with the ladies of the town and surrounding community in charge to receive, register, and show the general courtesies of the occasion to the constant stream of friends who came.

All were pleased to meet Mrs. J. K. Avent the wife of the new physician, who may now count her friends in Grenada County as "legion."

The Hospital management and the committee deeply regretted not being able to show the friends over a fully equipped hospital, but owing to the fact that the shipment had not arrived, there was little to be seen in the hospital line except two patients, neither of whom were receiving visitors on that day. So a later visit is in store for these friends.

There were 180 registered as present or sending gifts with good wishes. Many have since sent their contributions, and still others have reported as having boxes ready to send. The continued rains and impassable roads deterred these in the neighboring communities from coming, but the "shower" is still on it seems, and instead of a mere "shower", it has proven to be a real "down-pour" of hundreds of useful and valuable articles, each representing the real interest, gratitude, and good will, the people feel over having an hospital in their midst. The people in and around Grenada never do things by halves, and, as opportunity is given, are always glad to bid any good work God speed.

## YOUR TEETH

MISSISSIPPI STATE  
BOARD OF HEALTH  
Bureau of Child Welfare Division of  
Mouth Hygiene.

### CARIES

Decay of the teeth is called caries. Caries is the most widely distributed disease in the world. The bacteria that produce tooth decay are nourished by the food and mucus that is left to decompose about the teeth.

These bacteria grow rapidly. Their product is lactic acid. The lime that gives the tooth its hardness is dissolved away, so that a cavity is formed.

It is not exactly correct that "a clean tooth never decays," but it is so nearly true that those who do not keep their teeth clean invite caries and so do themselves a great injury. Keep your teeth clean and be on the safe side.

### OCCUSION

By Rea Proctor McGee, D. D. S.,  
Editor "Oral Hygiene"

Occlusion means the fitting together of the upper and lower teeth when the mouth is closed.

In the normal mouth the upper teeth extend slightly over the lower teeth all around. Each upper tooth strikes two lower teeth and each lower tooth strikes two upper teeth.

This arrangement acts upon the principle of a shock-absorber. Every tooth has a slight motion independent of the other teeth. When the jaws come together the teeth move a little and escape the jar. All bodily movements are due to the muscles pulling upon the bones according to the well known mechanical principles of the different forms of levers.

If the muscles of your arm worked upon the same lever plan that the muscles of your jaw work upon, you could throw a horse over a six foot fence without much trouble. This means that there is an immense pressure upon your teeth when you chew.

A soldier completely equipped for field service makes a pressure of eleven pounds to the square inch upon the ground when he walks. The human jaws in a normal man can exert a pressure of two hundred and fifty pounds to the square inch.

The lower jaw moves up and down, from side to side, back and forth and it also has a rotary movement. If any tooth is out of its proper position in the arch, it is very liable to receive the whole pressure of the jaws in some of these movements and the constant jarring that it receives will start an inflammation in the pericementum—the membrane that covers the root of the tooth and attaches it to the bone.

The same thing happens when the filling is too high, and sometimes when a tooth has been extracted the teeth on either side will move a little into the vacant space and cause one or more to strike too hard. This is called traumatic occlusion and is the cause of many cases of death of the nerve, alveolar abscess, pulp stones, enlargement of the end of the root, called exostosis, and pyorrhea.

If a tooth is slightly tender or seems to be in the way, a visit to the dentist will save a great deal of trouble.

One thing is certain, a tooth never hurts or even feels queer unless there is something the matter. There may be sham pains in other parts of the body, but whenever anyone tells you that his teeth hurt, they do.

## "GET OUT OF MY WAY"

—THE HURRAH, THE RUSH AND THE NOISE

The Watchman Magazine of Nashville had the following very thoughtful article in a recent issue in which it points to the "get out of my way" spirit and the rush and the jazz of the day as one of the alarming tendencies of the times. It said:

The almighty dollar has a rival as the national god of the American people—the "Great God Noise," says Earle Albert Rowell, in the November Watchman Magazine of Nashville, Tenn. The worship of his blatant majesty has pervaded even the fastnesses of nature:

"From early morning till early morning civilization is a piercing shriek of whistles, a dingdong of street cars, a honk-honk of automobiles, a clamor and a clang, a hodge-podge of sounds, a carnival of din, a concatenation of clatter, a crescendo of hubbub. The very streets are the highways of the hullabaloo. Carnivals with all their shouting, fanfare, and bobbery, festivals with all their tinkle, jingle, and tantara throng the streets. The weekly street dance, with its jangle of jazz music, is fast becoming the community institution of small town and large city. The public parade must be led by the measured roll of the drum and the fantasia of the band. The circus parade would pass unnoticed without its ever-present, ear-splitting, cacophonous calliope. The American people feel bereft if they cannot celebrate the Fourth of July by rending the skies with a thousand strident, thundering, deafening explosions ranging from the giant firecracker to the earth-shaking broadside detonation of the superdreadnaught in sham battle. Even on top of skyscrapers one is not free from the reverberation of city noises. One can hear the babble of scores of discordant sounds from the streets below; the muffled buzz; the stentorian voices of the newsboys; the clear, shrill siren of the police auto, of the ambulance, of the fire engine; the resounding roar of the staccato blasts of the unmuffled flying machine overhead. The sharp, piercing whistles of the arriving and departing trains mingling with the harsh, morning, noon, and evening whistles of hundreds of factories, mills, and manufacturing plants, filling the air with a confused jumble of combination.

"Silence, or aught resembling silence, seems to be dreaded as a dire calamity by most moderns—Almost every camp and bungalow is equipped with some noise-making apparatus that will rend the air and startle the echoes. The talking machine is taken into the forest depths and made the companion of the canoeist. The wind whispering in the trees, the sweet carol of the birds, the rippling murmur of many waters, do not satisfy the jaded ear attuned to the dissonant, clanging noises of the city. Any noise is preferred to the holy hush of nature. The sweet silences of the open spaces cannot be endured if it is possible to fill them with zip, hiss, and dissonance. Tourists are now importing canned music into the national parks amid the sacred glories of nature, and begin their mountain climbing to the strains of a jazz band."

Just as character and soul are sacrificed to the Moloch of money-lust, so our nerves are the offering we present to the "Great God Noise." Mr. Rowell asks, "Why is it that we are so afraid of the silences, so afraid to be alone and commune with ourselves? Why is it that people are anxiously awaiting the time when they can carry a radio set along with them so they may listen to something every moment of their waking time? What means this mania for noise, this dizzy delirium of sounds? Why this infatuation for frenzied racket? Is it a good or bad sign? Is it good for the mind, for the soul? There is no question but that the modern craze for noise is wrecking the nerves of men, women, and children. Anemics and neurasthenics are to be seen everywhere and are growing more numerous every day. Civilization's ten thousand thrills and quivering sounds are in a measure responsible."

Mr. Rowell answers his own questions by saying that the reason men prefer noise to silence is because they have forgotten God.

"Today men forget that the Lord is not in the multitudinous noises of civilization, that have been invented to drown out the still small voice—How much sweeter, how much more satisfying and soothing to tired jumpy nerves is the gentle music of the breezes in the foliage, the happy song of beautiful birds, the lulling purr of eddying waters! Here amidst the creation of God the soul can commune with its Maker. Jesus knew the distraction of the noise of civilization; He knew it was

impossible to communicate with God amidst the uproar of public life—Secrecy and silence are the twin requirements of communication with God. But both are next to impossible today. One must with deliberation and intent firmly shut himself away from the Babel of modern civilization if he would hear the voice of God speaking to him—Let us leave the city with its hum, its blare, its noisy pride, and go with Jesus up the mountain side where we can hear the still small voice speak to our soul, where we can enter into sweet, restful, strengthening communion with our Maker. Let us leave the shouting, boisterous throng and enter the portals of nature's silent temples of grandeur where we can hear God speak to us, God is always broadcasting His love. We can best get in tune with the Infinite amidst the virgin scenes of nature."

### H. T. HOWARD DIES SUDDENLY

Mr. Henry T. Howard, aged 81, died suddenly last Monday afternoon at the home of his half-sister, Mrs. R. A. McRee, on College Avenue, with whom he had been making his home. Mr. Howard was on the back porch buying apples from a vendor when he was stricken with a heart attack which caused instant death. The remains were taken Tuesday to Winona and interment was had five miles west of there.

Mr. Howard was a native of Carroll County. He had been a resident of Grenada for some time. He was quiet and unostentatious in manner, was kindly and considerate in his dealings with others and was a splendid Christian character.

To the distressed relatives, The Sentinel extends its sincere sympathy.

### TO TEACH FARMERS TERRACING

A. & M. College, Miss., A program has been worked out by J. T. Copeland, Extension Agricultural Engineer for the Mississippi A. & M. College to try to educate the farmers of Mississippi in the correct methods of terracing so that some of the losses resulting from devastating soil erosion over the state may be avoided.

To facilitate rendering this service to the people and to expedite the execution of a state-wide program of better terracing, a plan has been wrought whereby the county agent may receive expert aid in the training of a number of men of his county to terrace correctly.

The county agent of each county and the Extension Agricultural Engineer of the college are the co-operators in this plan. The county agent being responsible for securing suitable men to be trained and equipment for the demonstration and the engineer being responsible for subject matter and instruction. The Terracing School will last two days in each county continuing from ten o'clock in the morning till four in the afternoon. The first day will be devoted to lectures on the theory of soil erosion and practice in making terraces.

Eighteen counties have requested that the instruction be brought to them and the schedule brings them to Grenada Nov. 5 and 6.

Five men or not more than fifteen are enrolled in each county to receive the training. They are trained so that they may serve their county, community or Federal Loan Bank by correct terracing.

### THOSE INVOLVED

#### IN COAL STRIKE

As an aid to an understanding of the anthracite wrangle, the following figures, credited to the United States coal commission, may be found useful. They are taken from the "Interpreter," a publication of the foreign language information service, which secured them, it explains, from the coal commission's report of last July.

Of the 147,456 miners in Pennsylvania's anthracite mines more than half—or 77,765, to be exact—are foreign-born. More than half of these—or 42,012—are natives of Russia and Poland, who compose 28.5 per cent of the total number of miners employed. Though all but 431 of the foreign-born came to this country before 1915, less than half are naturalized citizens of the United States—and nearly half had made no declaration of intention to become citizens. "Of the 70,334 miners elsewhere than in the United States or the British Isles," it is added, "32 per cent cannot read or write, and 14 per cent cannot speak English!"

Yet we are told that 53,272 of the foreign-born miners live in their own homes, more than half of which are owned by their occupants, while only 30,605 of the native-born main-

tain homes and less than one-third shown. The infection of Red radicalism is spread most easily among aliens of that type. Despite that well-established fact, the figures above cited make it tolerably plain that neither the coal companies, the community leaders nor the union of firials in anthracite region have cared sufficiently for the welfare of these immigrants—or for the national welfare—to undertake their Americanization. It would be interesting to know the true reasons behind this "remissness," as the coal commission gently phrases it, "in the matter of teaching the foreign-born the language of the country"

Both the illiterates and those who speak no English become easy prey for agitators, as experience has ship."—N.O. Times Picayune.

## How a Single Industry Spreads Prosperity

A most significant fact about an industry is the large number of people who benefit from it.

Take the cement industry, as an example:

The mills used 9,000,000 tons of coal last year. This meant 9,000 coal miners steadily employed—their families, numbering not less than 25,000, maintained—and along with them tradesmen and other people enough to supply the needs of a town of over 50,000.

That is, of course, saying nothing of the business created for coal operators and transportation lines.

Sacks are not so large an item in the cement industry as coal, yet 50,000,000 new sacks, representing 50,000 bales of cotton, had to be bought last year for replacements alone. Back of this were cotton planters, plantation workers, mill owners, mill operatives and so on—thousands altogether.

And consider these other requirements of the industry last year:

3,700,000 barrels of fuel oil  
3,400,000,000 cubic feet of gas  
15,000,000 pounds of explosives  
32,000,000 pounds of greases and oils  
1,700,000 linear feet of belting  
4,500,000 firebrick for relining kilns  
7,000,000 pounds of paper for bags  
600,000 tons of gypsum

In addition the industry bought quantities of heavy grinding and burning machinery, locomotives, cars, rails, electrical and other necessary equipment.

In this way a single industry spreads prosperity to many others.

OVERLAND CHAMPION  
IS FARMER'S FRIEND

At last the farmer has been given a closed car of superior finish inside and outside, that he can utilize for various farm jobs and "chores" with the same cheerful abandon as he does his open touring car.

Thousands of farmers have expressed the opinion that they would gladly use closed cars if they could press them into practical work and get out of them the same all-round service the touring car provides.

This has been the farmer's winning argument for the touring car over the closed car for some years and it is admittedly a reasonable one. Practical service on the farm means the hauling of grain and other material of a highly "spillable" nature. A load of bran or shorts for instance leaves a car resembling the interior of a feed grinding room. Whole grain, despite every precaution will persist in "creeping" out of the bags and scatter to every corner and crevice of the car.

Summing up "practical service" for the farmer means the hauling of milk cans, live poultry, root crops, cans of kerosene, machinery oil, household supplies, garden tools, implement parts, rolls of belting and a long list of every conceivable sort of usable material on the farm from wire fencing to an occasional live calf.

No wonder the farmer hesitated to invest his money in a closed car. But now the wonder ceases with the advent of the new Overland closed car, fittingly named the Champion, for the good and logical reason that at \$695 it leads the world in closed car values and "champions" the cause of the farmer in every respect.

This new model, having as many personalities as a South American Chambleon can proudly claim the distinction of being called "America's most versatile car" for introducing the Champion, Willys-Overland has succeeded in bringing out something absolutely novel and radically unique; in fact a type of motor car that the farmer has long wished for—and now has. It is probably the most extraordinarily useful car for the farmer that has ever been produced, with an all steel body built on a standard Overland chassis cradled on the famous Triplex springs and powered with the larger Overland engine. Exclusive features, utilities and economies mark this model as a remarkably convenient car, warranted to give the utmost in closed car benefits to the farmer.

EDITOR TELLS 'EM  
WHERE TO HEAD IN

He's Through Patting Folks on the Back When They Don't Deserve It.

Editor Frank J. Raymond, publisher of the Blakesburg, (Ia.) Weekly Excelsior, is tired of running free advertisements and in an advertisement of his own, tells the world about it as follows:

"Here you will find a schedule of prices from which no deviation will be made, but we hope to donate a certain percentage of our earnings to ward founding an asylum for those feeble-minded people who believe an editor has a soft snap.

"For telling Excelsior readers a man is a successful citizen when everybody knows he is as lazy as a bench warmer, \$2.75.

"For referring to some gallivanting fellow as one who is mourned by the entire community when he will only be missed by the booters, \$10.18.

"Referring to one as a hero and a man of courage and one who will stand by his convictions when everybody knows he is moral coward and would sell out for a dime, \$4.13.

"Referring to some gossip female as an estimable lady whom it is a pleasure to meet and know, when every man in town would rather see Satan coming, \$3.10.

"Calling an ordinary preacher an eminent divine, 54 cents.

"Lambasting the daylight out of John Barleycorn at the behest of the local dry forces, \$6.77.

"Whooping 'em up for the repeal of the Volstead law in the interest of the local White Mule Funnell Club, \$6.77.

"Referring to a deceased merchant who never advertised and who was too stingy to contribute toward needed public improvements as a leading citizen and representative resident, \$344.99."

THE BOOK FROM  
"KIVER TO KIVER."

Interesting Editorial Which Shows Dangers of the "Modernist's" Construction of Parts of the Bible.

From the New Orleans Daily States of October 1, The Sentinel reproduces the following ably writ-

ten and interesting editorial from the pen of Col. Robt. Ewing which presents some stone walls for the evolution theory of the Bible:

"It has been gratifying to The States to learn that its Sunday editorials on religious topics have struck a sympathetic chord in the hearts and minds of a great many readers of this newspaper. That they are bearing fruit in wide and unexpected quarters we are told is true. The session of an old and historic church, from whose pulpit there once sounded a triumphant note of orthodoxy, is said to be investigating the strange doctrines that are being taught in the Bible classes, where the Darwinian theory of the origin of man and other atheistic theories are set before immature and unscholarly minds as being the truth, and the Biblical account of man's creation flouted as a "parable" or an allegory.

A prominent Baptist minister at Baton Rouge takes one of these editorials as a text and preaches a sermon to his congregation on orthodox Christianity.

"The more blatant of the expounders of Modernism are quieter and are 'easing' their false teachings into ears that once were forced to listen to an open and fearless teaching of them.

"We are glad to be of some service in this cause. For, as we have often said, the only thing in life worth while is a man's religion. If that gets away or crooked or twisted, then he is not so good a citizen as he once was, and if his numbers multiply and the whole church becomes tainted, the effect on the body politic is not healthy or wholesome.

"It is so easy for teachers to dodge these matters. There are a few timid souls who are as correct and orthodox in their beliefs as St. Paul, but who abhor controversy of any sort, and think there is nothing in these discussions. They say, for instance, that it matters not whether Mr. Bryan is right or wrong in his great crusade for the old Bible and its orthodox teachings. That it is no concern of the people where they come from, since they are here, and that is the vital, the essential thing. That no one should worry over the origin of the Bible; that we have the Book, and that is the thing that counts.

"Such teaching, of course, when analyzed, is found to be full of errors. The material thing in life is not that we are here. Surely it is: How did we get here? What are we to do while here? And, where are we going when we leave? If God did not create Adam in God's own image, then the Biblical account of man's origin which Christians for 1923 years, and Jews for many centuries before Christ have believed is false, and with it tumbles the veracity of the Bible. Destroy man's faith in the Bible and you destroy his faith in all revealed religion, in God, in Christ, in a future existence. It is, according to our simple notion, a very vital thing to know where man came from; and with it, what purpose God had in putting him on earth; and whither he is going when he leaves this earth.

"Gamaliel Bradford, in his wonderful life of Robert E. Lee—the best of all the biographies of the great Virginian—says, in discussing Gen. Lee's spiritual life: 'In Lee's army the soldiers discussed Darwin and concluded that "Marse Robert" was a sufficient proof that man was not descended from apes."

"There you have the crux of the matter of evolution. If there is anything in the theory, why has not a greater soldier than Gen. Lee come up from the Anglo-Saxon race since his death? Why did not the great war produce in France a greater leader than Napoleon? It is well known that the great war did not produce a first-rate soldier, no general that would compare with Grant or Jackson, to say nothing of Washington and Lee. Has America, for instance, produced a race of men since 1776 that will compare with those who, led by Washington, won American independence and wrote the Constitution of the United States? Has the world in these two centuries produced a man the equal of Washington? Has science, the boasted, vaunted science that shoots its puny darts at God and the Bible, produced a mind the equal of Sir Isaac Newton's?

"There is one thing that puzzles us in considering this matter, and that is that Darwin, who is the protagonist of the Modernist clan, lost his faith in Christianity and became an infidel; and that every man who teaches the Darwinian theory is more or less loose in his religious belief. We have never heard of a great scientist who, like Newton and Kelvin and a host of others, was a simple Christian, disbelieving in the divine creation of the world and of man, in the divine birth of Christ,

## COMMISSIONER'S SALE.

By virtue of a certain decree of the Chancery Court of Grenada County, Mississippi, rendered at the regular October Term, 1923 thereof, in cause No. 3799 of the General Docket, styled George Brown, et al Versus Ed Golliday, et al, the undersigned commissioner will on November 19th, 1923, within legal hours, offer for sale and will sell at public auction, for cash, to the highest and best bidder, at the East door of the Court House in the City and County of Grenada, State of Mississippi, the following property situated in Grenada County, Mississippi, to-wit:—

Northwest Quarter (NW 1/4) of Section Thirty-two (32), Township Twenty-two (22), Range Seven (7) East.

Witness my signature this the 20th day of October, A. D. 1923.

NEW CLUTCH PEDAL  
EASILY MANIPULATED

There is one improvement in Dodge Brothers motor cars which prospects pass over without much comment when it is being explained to them, but which they all speak of with real enthusiasm after they have driven the car according to T. H. Meek, local Dodge Brothers dealer. This is the remarkable ease with which the clutch lever is now controlled, due to a change in leverage between the foot pedal and clutch proper.

"Not having had to exert themselves unduly in manipulating the clutch pedal on Dodge Brothers cars of past years, owners and visitors do not seem greatly excited over this apparently unimportant change," said the dealer. "However, once they get in traffic and find how easy it is to let the clutch in and out, without tiring the foot in the least, they understand and appreciate what has been done. This is particularly true of ladies, to whom a stiff clutch pedal is a source of much annoyance. There are dozens of similar minor improvements, in addition to the major refinements with which nearly one is now familiar."

## WOMEN ARE CHANGING

A favorite quotation of preachers and orators in the old days was "The hand that rocks the cradle rules the world." Of course this is all wrong, since times have changed and people are becoming civilized. It is now heathenish to have a cradle to rock. It is in order to say: "The hand that yields the lip stick rules the world." You used to ask a lady, "Do you paint?" and you were talking of art on canvas. Now there is no use to ask a woman that, for you can see for yourself. It used to be fashionable for a girl to blush, and she was beautiful as color from her heart spread over her face. Now nothing will make some of them blush, and you would never know if they did.—Richmond Christian Advocate.

in the supernatural in miracles and in the inspiration of the Scriptures. Like old Lem Jucklin, of North Carolina, they all believed in the Book 'from kiver to kiver.' And so do we."

## NOTICE TO CREDITORS

Letters testamentary having been granted on the 9th day of October, A. D. 1923, by the Chancery Court of Grenada County, Mississippi, in cause No. 3862 of the general docket of said Court, to the undersigned upon the estate of H. C. Beasley of Grenada, Mississippi, deceased, notice is hereby given to all persons having claims against said estate to present the same to the Clerk of said Court for probate and registration according to law within six months from this date, or they will be forever barred. This the 9th day of October, A. D. 1923.

# TENANCY INCREASE HAS ABOUT REACHED ITS LIMIT IN THE SOUTH

A study of the distribution of farms in the United States according to tenure for each of the ten-year periods since 1880 reveals the fact that the greatest increase in tenancy took place from 1890 to 1900. In that decade the number of tenant farms about doubled, their number increasing much more rapidly than the number of farms worked by owners. Since 1900, however, the increase in tenant farms has slowed down greatly, and from 1910 to 1920 the increase was only 4.3 per cent. In 1880 only one-fourth of the farms in the United States were operated by tenants; in 1890, 28.4 per cent; in 1900, 35.3 per cent; 1910, 37 per cent; and in 1920, 38.1 per cent.

In the South a larger per cent of the farms are operated by tenants than in the country as a whole. There are 3,206,664 farms in Greater Dixie and of this number 1,591,121, or 49.6 per cent are worked by tenants. However, this number of tenant farmers includes 561,091 croppers, who in one sense of the word are not tenants but merely hired hands. There is no great difference between a cropper and a hired hand. One of them receives his pay in a share of the crop and the other in money, but neither one exercises any appreciable control over the handling of the land. The farm owner decides what is to be done, and both hired hands and croppers merely carry out his instructions.

If croppers were not considered as tenants, the percentage of tenancy in the South would be reduced from 49.6 per cent to 38.9 per cent for croppers make up 35 per cent of all the tenants in the South. However, the largest tenure class in the South is the share tenant proper (the tenant who pays rent with a share of the crop but furnishes his own living and equipment) who composes about 41 per cent of all tenants. Cash tenants make up 13 per cent of the tenant class, standing renters (those who pay for use of land a fixed quantity of a product) 6 per cent, while the other 5 per cent is composed of share-cash and unspecified tenants.

For the South as a whole the percentage of tenancy in 1920 was the same as for 1910, namely, 49.6 per cent; and among the sixteen states counted as Southern by the Census Bureau, only six showed an increased per cent of tenancy; Georgia, North Carolina, South Carolina, Arkansas, Louisiana and Texas. Georgia with 66.6 per cent of her farms operated by tenants leads all states. Tennessee and Mississippi show the same percentage of tenancy in 1920 as in 1910, while Maryland, Virginia, West Virginia, Alabama, Florida, Kentucky and Oklahoma show a decrease ranging from a fraction of 1 per cent in Kentucky to 4.3 per cent decrease in West Virginia. This decrease does not necessarily mean there was an actual decrease in the number of tenants, but that the proportion of tenants to owners is smaller.

In the South 37.3 per cent of the value of all farm property is in farms operated by tenants. Tenant farms have 39.7 per cent of the value of the farm land in the South, 23.4 per cent of the value of all farm buildings, 22.2 per cent of the value of implements and machinery, and 33.3 per cent of the value of the livestock.

The foregoing figures indicating the extent and trend of tenancy in the South force the opinion that our problem is not necessarily one of preventing the increase of tenancy, for it seems to have about reached its limit. If there is any increase in the future, it will probably be small. But there must be a reduction in tenancy if we are to have the best type of rural development. However, the most pressing problem at present is the improvement of the conditions under which tenants live. Tenancy is not necessarily undesirable if it is used as a stepping stone to land ownership. But under present conditions too many tenants remain tenants all their lives, and those who do acquire land often do so at the sacrifice of their social welfare. It should be possible for a tenant to acquire land and yet live a fairly joyous existence while striving to reach that goal. As a means to that end, the adoption of better leasing methods will do much. It must not be assumed, however, that this will solve all tenancy problems. The co-operation of society is needed for the correction of tenancy evils. —Progressive Farmer.

## DOESN'T KNOW HE'S WELL OFF

Father-in-law—So you are beginning to find that married life has its troubles?  
Daughter-in-law—Well, yes, Jack sometimes won't listen to reason.  
Father-in-law—Young rascal. He ought to be ashamed of himself. It isn't every married man has the chance.—Pearson's Weekly (London).

Tasted Horrid.  
Mother—Good gracious me! What on earth's the matter?  
Maid—It's all because she don't like her new gloves, ma'am.  
Mother—Why? They look very nice.  
Small Child (between sobs)—They may look nice—but they taste—simply horrid!—London Punch.

Willing to Bear It.  
"What did papa say when you asked permission to marry me?"  
"He asked me if I felt capable of assuming a heavy burden."  
"And what did you tell him?"  
"I told him I could take care of all he would give us."

Handsome Praise.  
Hub—I hear that you told Mrs. Gadd that I was a second-hand husband.  
Wife—Now don't get huffy, dear. I meant that you were like the second hand of a watch—so awfully quick getting around.

KNEW HER  
"The ideal 'Woman's Page' in this paper is nearly all about men!"  
"Well, that's what we're interested in, isn't it?"

Got Cold Shoulder.  
He lost his heart to a sweet lass—  
Though shy at first, he grew bolder.  
And then he asked her for her hand,  
But she gave him the cold shoulder.

It's So to Others, Anyway.  
"Does your husband enjoy sound sleep?"  
"Really, I don't know. Sometimes from the sound he makes I think it must be agonizing to the poor fellow."

Inclined That Way.  
He—Do you think your father would be willing to help me in the future?  
She—Well, I heard him say he felt like kicking you into the middle of next week.—Boston Evening Transcript.

The Desire for Change.  
Mother—I don't know what the matter is with that child. He won't stay in the same place any length of time.  
Father—He probably got it from his nurses.

As Your Wife Does at Home.  
"What is your idea of a clever woman—a woman who can see the point of a joke?"  
"No; a woman who can laugh at a joke without seeing the point."

A Waggish Woman.  
"Marry me," pleaded the poet. "You are the well from which I draw all my inspiration."  
"No, Arthur," the girl replied, "but I don't mind being a cistern to you."

Or an Umbrella.  
"Pa, what is preparedness?"  
"Preparedness, my son is the act of wearing spectacles to breakfast when you know that you are going to have grapefruit."—The Lyre.

Part Time.  
"Won't you really come—it will be a lovely evening?"  
"I can't dear; I'm in half mourning."  
"Well, only stay for half the evening."—Film Fun.

IN HER NAME NOW  
"He used to be the richest man in town."  
"Isn't he now?"  
"No, his wife's the richest woman in town."

Dishwasher Preferred.  
He married a highbrow.  
And now he wishes  
He'd wed a girl who knew  
How to wash dishes.

Giggling.  
Lady (at the market)—I would like to look at a nice fat goose.  
Market Man (much rushed)—Yes, ma'am; just a minute; my wife will be here.

In Every Way.  
"The average doctor's waiting room is very depressing."  
"There may be method in it. We all feel much better as we go out."

Can't Lose!  
Ethel—So Gladys figures her coming marriage will place her on Easy Street.  
Clara—If it doesn't a divorce will.

## STATE VETERINARIANS MEET IN GRENADA

Held Two-Day Session During Fair, Officers Elected. Meet Next at Greenville.

A big feature of the fair the second day was the eighteenth annual meeting of the Mississippi State Veterinary Medical Association which assembled Wednesday morning at ten o'clock in the directors room of Grenada Bank. The meeting was presided over by Dr. I. W. Edwards of Vicksburg, president of the association. After invocation by Rev. R. A. Tucker, Hon. W. S. P. Doty, member of the local bar in his welcome address made the visiting veterinarians feel thoroughly at home in Grenada.

The response to Mr. Doty's cordial welcome was made by Dr. D. F. Luckey, Live stock commissioner at the National Stock Yards, Illinois, who substituted for Dr. Taft Butler, of Memphis, editor of the Progressive Farmer, who was unable to attend the sessions. Dr. R. M. Staley, of Philadelphia, next addressed the gathering on "Bovine Abortion, Rabies and Various Anthrax Vaccines." "Current Therapeutics" was the subject of a discussion by Dr. E. L. Quitman, of Chicago, associate editor of Veterinary Medicine, who was followed by Dr. C. A. Cary, Alabama State Veterinarian, who talked on "Poisonous Plants in the South." The members spent the afternoon taking in the wonders at the fair. Wednesday evening the Grenada business men entertained at a banquet in honor of the veterinarians. An elaborate menu was prepared for the guests and during the course of the banquet several vaudeville features were presented by way of entertainment.

The meeting of the association came to a close Thursday after a two-day session, which developed many points of interest and value for the representative body which attended. The convention was held in conjunction with the Fair now in progress.

The program opened with an authoritative talk on sheep diseases by Dr. D. F. Luckey, Illinois live stock commissioner. He was followed by Dr. C. E. Salsbery, of the Jensen-Salsbery Laboratories in Kansas City, Mo., who brought out a number of problems of general veterinary interest. Dr. W. O. Hughes, ex-Army veterinarian, read a paper which was well-received by all. Remarks along the line of health certificates were made by Dr. H. Chadwick, executive officer of the Mississippi live stock sanitary board.

The most interesting event of the day was the visit to the Cotton States Anti-Hog Cholera Serum Plant, located in Grenada. During that feature Dr. J. S. Clark, B. A. I. Inspector in charge, presented a discussion of serum and virus production.

The meeting adjourned for an inspection of John Borden's Glenwild plantation and later devoted the afternoon to the attractions at the fair grounds.

Officers of the organization are Dr. I. W. Edwards, of Vicksburg, president; Dr. John Oliver, Jr., of Columbus, and Dr. G. B. Bradshaw, of Hattiesburg, vice-presidents, and Dr. Hugh L. Fry, of Jackson, secretary-treasurer.

Officers for the coming year were elected as follows: Dr. W. P. Ferguson, Grenada, president; Dr. R. H. Mohlenhoff Cleveland, 1st vice president; Dr. B. M. Davenport, Scott, 2d vice president; Dr. C. G. Stalworth Drew, secretary-treasurer. The next meeting will be held at Greenville in January 1925.

### I AM YOUR TOWN

Make of me what you will—I shall reflect you as clearly as a mirror—throws back a candle beam.

If I am pleasing to the eye of the stranger within my gates; if I am such a sight as, having seen me, he will remember me all his days as a thing of beauty, credit is yours.

Ambition and opportunity call some of my sons and daughters to high tasks and mighty privileges, to my greater honor and to my good repute in far places, but it is not chiefly these who are my strength. My strength is in those who remain, who are content with what I can offer them, and with what they can offer me. It was the greatest of all Romans who said: "Better be first in a little Iberian village than be second in Rome."

I am more than wood and brick and stone—more even than flesh and blood—I am the composite soul of all who call me Home.

I am your town.—(Exchange.)

## THE TARIFF AND THE STATES

What the Tariff Does to Kansas  
Kansas Tariff Gains.....\$ 256,698  
Kansas Tariff Loss.....66,418,876

What the Tariff Does to Texas  
Texas Tariff Gains.....\$ 2,667,753  
Texas Tariff Loss.....177,774,781

What the Tariff Does to Washington.  
Washington Tariff  
Gains.....\$ 526,700  
Washington Tariff  
Loss.....55,348,100

Washington, Oct. 15.—"What the Tariff Does to the State of Washington" is the title of the latest pamphlet issued by the Fair Tariff League, a protectionist organization of which Mr. H. E. Miles is the Chairman.

As in the cases of Kansas and of Texas, previously made public, the gains to a few to the farmers as consumers and to the non-farming population is extremely large.

The figures for the State of Washington, worked out on a minimum estimate, and adding only one-half of the tariff to manufactured products, are as follows:

Washington tariff.....\$ 526,700  
Washington tariff loss....52,348,100

Net tariff loss.....\$51,821,400  
The only product of the state on which there is a tariff gain is wool. There are 283,382 farmers, of whom 4,244 are wool-growers, or one wool-

### ELECTION NOTICE

Coming on for consideration the petition of H. J. Ray and others asking for an election on the question of forming Supervisors' District Number One of Grenada County into a separate Road District under chapter 150 of Laws of 1910, and Chapters 172 and 177 Laws of 1916, and Chapters 276 and 279 Laws of 1920, and all other acts amendatory thereof, and it appearing to the Board from the report of the committee appointed to investigate said petition that same contains the names of more than 20% of the qualified electors of said Supervisor's District One, and that same is otherwise in legal form; it is ordered that said petition be granted and the question of the establishment of a separate road district composed of said supervisor's district No. One, of Grenada County, be submitted to the qualified electors of said district, said election to be held at the same time as the general election to be held on Tuesday, November 6th, 1923; and it is further ordered that the election commissioners of Grenada County have placed upon the ballots for District No. One, of said county to be voted in said election the question of the formation of said separate district, and that they give notice of the holding of said election upon the question of the establishment of said separate road district on said day, by publication of notice in The Grenada Sentinel, as required by law; and make their report to this board showing the result of said election at its next regular meeting in December, 1923.

Ordered further that the clerk of this Board certify a copy of this order to said Election Commissioners of Grenada County. This the 11th day of October, 1923.

Stille of Mississippi,

County of Grenada.

I, J. B. Keeton, Clerk of the Chancery court in and for the county and state aforesaid, hereby certify that the above and foregoing order is a true and correct copy of an order passed by the Board of Supervisors, of said county and state, at their Adjourned October, 1923 meeting, on the 11th day of October, 1923, and of record in Minute Book "H" on page 574 of the Minutes of the Board of Supervisors in my office.

Witness my hand and seal of office, this the 19th day of October, 1923.

J. B. KEETON,  
Clerk Board of Supervisors  
By G. DRAPER, D. C.

### AN IMPOSSIBLE TASK

It is a physical impossibility for The Sentinel to get the names of all the visitors to the fair this week for it would take volumes to carry locals about all the visitors. It is well-nigh impossible to secure the names of all former citizens who were here visiting relatives but this paper would be glad to have their names from relatives and carry them in the local column next week. The paper has been working under extreme difficulties this week and very little time was found to secure local news.

grower to 66 farmers, and one wool-grower to 320 residents, according to the last census.  
Against the \$526,700 tariff gain on wool to a few farmers are set forth the losses in detail to the farmers as consumers and the non-farming population in the following table:

### AGRICULTURAL SCHEDULE

Loss	
Washington farmers as consumers.....\$ 965,100	
Balance of population.....3,655,400	
Total loss on agricultural schedule.....\$4,620,500	
Net loss on agricultural schedule.....4,093,800	
Washington farmers lose on the agricultural schedule nearly \$2 to \$1 of gain and the state loss on the agricultural schedule is \$9 to \$1 of gain.	
The agricultural schedule as compiled by Mr. Miles' experts is made up of the following agricultural products of which the people of Washington are users and the detailed losses are set forth as follows:	
Non-	
Crops	Farmers
Wool.....\$236,800	\$ 897,200
Sugar-beets.....566,700	2,146,500
Flax-seed.....85,000	322,000
Lemons.....28,400	107,300
